FLASHFORGE®
3D PRINTER

Limited Space, Unlimited Creativity

LCD printer with high efficiency & high precision

Foto 6.0

Flashforge Newest 6" 2K Monochrome LCD

◆ Larger Build Volume

Build volume: 130 * 82 * 155 mm.
Make larger print easier.

◆ More Stable Framework

The Z-axis is supported by dual linear rails, rod motor and clearance nut combination which dramatically improves stability while in motion and reduces the risk of layer shifting. Cooling device for stable printing performance and longer service life.
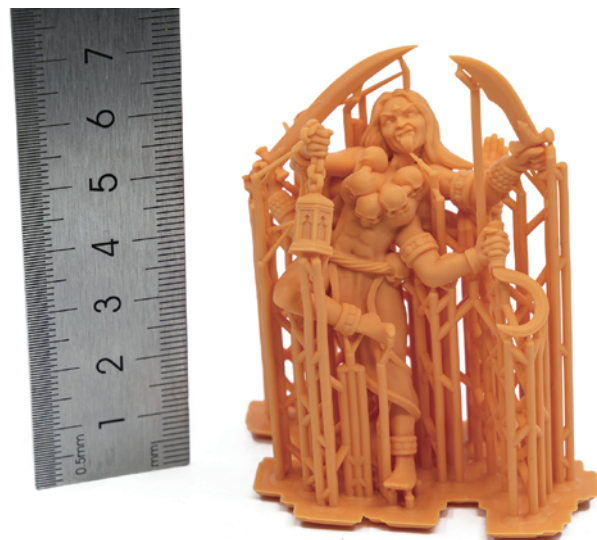

◆ Fast and high-precision

With high-quality 6" 2K monochrome and newly designed UV integrated light. Higher efficiency and better print effect are maintained by a uniform light exposure which is significantly improved from the previous generation. The printing speed is 30mm/h, which is 2 times faster than the color LCD.

◆ Better Print Experience

Resin includes basical resin and water-washed resin. The material has good strength, easy to clean, and more detailed performance.
Professional slicing software, easy to use, more functions, and smoother printing models.

Specifications

Printing Speed	10-30 mm/H
Build Volume	130*82*155 mm
Layer Res	0.05-0.1 mm（Adjustable）
XY Res	0.05 mm
Light Wavelength	405 nm
Z-axis	Industrial grade dual linear rails
LCD Screen	6.0 Inch 2K industrial grade monochrome
Build Plate	Matte Plate (More Adhesive)
Tank Volume	0.25L
Connectivity	USB
Power	60W
Printer Size	230*200*410mm
Operation Screen	3.5 inch touch screen
User Friendly	Easy to replace the LCD screen
