Eco-friendly printing

Adventurer 5M Pro adopts a dual filtration system of internal and external circulation. Dual-layer filtration: HEPA13 and activated carbon, effectively blocking 99% of particles and VOCs, thus protecting your respiratory system.

Internal Circulation Filtration

Continuously filters and circulates the air inside the chamber.
(Suitable for ABS, etc.)

External Circulation Filtration

Draws fresh air from the outside into the chamber while the filtered internal air circulates outside the printer.
(Suitable for PLA/PETG, etc.)

**50dB low-noise printing,
no disturbance to work
or study**

available for Pro version

Easy-maintenance nozzle for both rookies and experts

Quick-detachable nozzle requires no tools for change in just 3 seconds

Various nozzle diameter (0.25/0.4/0.6/0.8mm) options suitable for both high-precision and high-efficiency mode

Remote Camera Monitoring

available for Pro version

Filament Run-out Reminder

Automatic Shutdown

available for Pro version

Power Loss Recovery

Flexible PEI Steel Plate

Integrated Printing Management

Adventurer 5M Pro

Enclosed 3D printer equipped with a dual filtration system, suitable for use in closed environments such as study rooms and classrooms

Adventurer 5M

Open 3D printer, suitable for use in open and well-ventilated environments
